E-Mail: churchvillenaturecenter@co.bucks.pa.us* Web-site: www.churchvillenaturecenter.org

Dear Teacher,

We look forward to your visit to the Churchville Nature Center. A quality educational experience is our first priority for your trip, but as we all know, children love to take home souvenirs from class trips. The Nature Center's Dragonfly Niche Gift shop has plenty of children's items for kids to choose from. **All proceeds from our gift shop directly benefit CNC's education and preservation efforts.** If you would like to give your students the opportunity to pick up a souvenir to take home with them, we have two options to choose from:

A Visit to the Gift Shop by Your Students

Great for small groups with plenty of extra time

We allow six students at a time into our gift shop. They must have at least one adult to accompany them into the store. The adults must watch over them while they shop and check to make sure they have enough money with them, including PA State Sales Tax (6%), to make their purchase. Once a child has made their purchase and left the gift shop we allow another to come in. We find it works well for the teachers to give the students a time limit to help move the group along. If your group must be finished by a certain time, please make sure that we are aware of that at the start of the students' shopping time.

Our Gift Shop Order Form (Attached)

For large groups and those with no time allotted for a store visit

Just photo copy the attached order form and send it home with your students to fill out with their parents and return to you with the exact amount due. Please note that we have already figured the PA State Sales Tax into the price of each item on the order form for the students, so they need not worry about calculating that percentage. The Nature Center will accept personal checks from parents if that is how they wish to pay for their child's order. Please have them make all checks out to "Churchville Nature Center". Drop off your orders at the gift shop upon arrival at the Nature Center, and we will bag the orders while you and your students are enjoying your program. When you leave, stop by the gift shop and we will have all of your students' shopping bags all neatly packaged into larger bag for you to distribute back at school. Please stress to your children to make sure that their name is on their order form and that they have correctly added their purchases up.

New: Along with this pdf you will also find accompanying the order form digital pictures of each item on the list to assist teachers, students and parents in selecting items from our order form.

Churchville Nature Center Gift Shop Order Form

Name _____ Room/Teacher _____ 4/1/15

MOUNTAIN LION: The mountain lion is the largest and the most widespread of the cats native to North America. They range from southern South America to northern Canada and from sea level to mountain tops. Because of this wide range, many recognizable subspecies have evolved. As a result of hunting pressure and habitat loss, the mountain lion has survived mostly in the western U.S. In places like southern Florida there are small isolated populations. Recently, however, due to the regrowth of forests and the increase in the population of white-tailed deer (its main prey), the mountain lion's range has begun to expand.
